

**Chess promotes:**

1. Gender equality, as men and women can play under the same conditions.
2. Inter-generation relationships, because youngsters can play with elderly people.
3. Mental gymnastics (to prevent neuro-degenerative illnesses as Alzheimer).
4. Fight against racial prejudices, as it is a game associated with intelligence.
5. Its generalized practice, as it is economic (just a chessboard and a set of pieces).

Proposal

**Official chess courses**

Levels: 6

Base materials: "Chess for Everybody"  
Instruction: in person and/or e-learning

Examinations:

1. Beginner's level 1 and 2, through INTERNET.
2. The rest of levels: in person (supervision by the Federations).

Persons who pass the examinations would obtain FIDE ELO rating ( rating level depending upon level of instruction ).

**Theory titles of IM and GM**

Masters courses imparted by Universities.

E-learning (Moodle platform).

Titles validated by FIDE.

**Benefits for the Federations**

Distribution of the fees among the different Federations: international, national and regional.

Increase of federation licenses and chess practitioners.

Commercialization of printed books of the "Chess for Everybody" collection.

**Solidarity**

Scholarships for chess players without resources from developing countries.
